Hörmann brand quality
Reliable and oriented towards the future

“A good reputation must be earned.” (August Hörmann)

In line with the founder’s philosophy, the Hörmann brand today is a true promise of quality. The family-owned company has over 75 years of experience in door and operator construction and, with sales of over 20 million doors, is no. 1 in Europe. This makes a Hörmann operator a reassuring purchase.
Brand quality “Made in Germany”
All doors and operator components developed and manufactured by Hörmann are perfectly matched to each other and tested and certified by independent, recognised institutes to ensure your safety. They are manufactured in Germany according to the DIN ISO 9001 quality management system and meet the requirements of European standard 13241-1. Furthermore, our highly qualified employees work intensively on new products, continual further developments and improvements to details. The results are patents and one-of-a-kind products you can depend on.

Door operators for generations
Endurance tests under real-life conditions ensure mature series products with Hörmann quality. Thanks to this, as well as excellent technical solutions and uncompromising quality assurance, you receive a 5-year warranty on all Hörmann garage door and entrance gate operators.*

An eye on the future
Hörmann is setting a good example. This is why, since 2013, the company has obtained 40% of its required energy from green sources and will continue to increase this percentage. At the same time, many tonnes of CO₂ are saved each year thanks to the introduction of an intelligent and certified energy management system. And last but not least, Hörmann offers products for sustainable construction.

Find out more about Hörmann’s environmental activities in the “We think green” brochure.

* The complete warranty conditions can be found at: www.hoermann.com
Convenient and safe with bi-directional radio technology

Our bi-directional, high-security BiSecur radio system is based on future-oriented technology that allows you to conveniently and safely operate garage doors, entrance gates, lights and much more. Functions are operated using exclusive hand transmitters. Querying the door position is an especially convenient feature: you can see if your door is open or closed at the press of a button.
Certified security with a stable and interference-free range

The newly developed, extremely secure BiSecur encryption protocol makes sure that no-one can copy your radio signal. It was tested and certified by security experts at Bochum University.

128-bit encryption

Benefit from the same high security level as in online banking.

Innovative technology in an elegant package

The new, exclusive BiSecur hand transmitters are set apart by a black or white high-gloss surface in a piano lacquer look or a black textured surface, as well as an elegant shape that fits easily in the palm of your hand. Chrome caps create accents, completing the high-quality look.

Hörmann’s BiSecur hand transmitters with optional high-gloss surface have been awarded a design prize by an international jury.

A complete overview of BiSecur hand transmitters can be found starting on page 26.
You no longer have to go out in all kinds of weather to check that your garage door is closed. At the press of a button, the colour of the LED on the HS 5 BS hand transmitter indicates the position of the door. If required, another push of a button* closes the door.

* An additional photocell is required for operation without visual contact to the door.
With the HS 5 BS hand transmitter, you can check whether your door is closed at the press of a button.

- As standard with garage door operator SupraMatic
- Optional for garage door operator ProMatic
- As standard for entrance gate operators RotaMatic and LineaMatic

Take a look at the video at: www.hoermann.com/en/videos

BiSecur smartphone app – NEW
- To operate Hörmann operators, entrance doors and other devices: smart, at any time and worldwide
- Display the door position of your garage door and entrance gate operators
- Display the locking state of your entrance door**

For further information, see the BiSecur Gateway brochure.

** With special equipment
Good reasons to try Hörmann
Garage door operator quality features

1 Safe

2 Reliable

Anti-lift kit
Burglars have a tough time when it comes to Hörmann automatic garage doors: When the garage door is closed, the anti-lift kit automatically engages in the guide rail stop, immediately locking and securing it against forced opening. This lock is purely mechanical and, in contrast to operators from other manufacturers, effective even in the event of a power failure.

Only from Hörmann

Automatic safety cut-out
The reliable automatic safety cut-out securely stops the door if it encounters an obstacle. For even more protection and safety, we recommend fitting a non-contact photocell. This is a standard feature in the Hörmann SupraMatic P operator.

Soft start and soft stop
Your door opens and closes quietly and smoothly. The start and stop phases can be individually set for your garage door. This protects your garage door, allowing you to enjoy it for years to come.

Take a look at the video at: www.hoermann.com/en/videos
Tested safety
Hörmann garage door operators are perfectly matched to the sectional garage doors and have been tested and certified by TÜV Nord in accordance with the TTZ directive “Break-in resistance for garage doors”.

SupraMatic operator
You can enter faster and more safely with the SupraMatic operator when combined with a Hörmann sectional garage door. An opening speed up to 50% faster means more safety and less stress on high-traffic streets. Compare the opening speed of the SupraMatic operator with conventional operators.

Take a look at the video at: www.hoermann.com/en/videos
This combination of speed and convenience is fascinating. Your sectional garage door opens faster and you can drive directly from the street into your garage. The SupraMatic has many added functions, such as being able to switch the lighting on and off with your hand transmitter, and the convenient option of an additional opening height to ventilate your garage. An operator cover made of brushed aluminium also provides the SupraMatic with a very elegant appearance.
**Low power consumption costing only around £3 per year**

**Convenient querying of the door position**
You can use the standard HS 5 BS hand transmitter at any time to check that your garage door is closed.

**Faster door opening**
An up to 50% faster opening speed gets you from the street into your garage sooner.

**Additional opening setting**
With an adjustable opening option, you can ventilate your garage without completely opening the door.

**Halogen lighting can be switched on / off separately**
The operator lighting can be switched on and off separately via your hand transmitter or the IT 3b optional internal push-button unit. Optionally available as an LED reflector lamp.

**Easy-to-use programming**
All of the operator functions can be set very easily by entering a two-digit number.

**High security**
The standard EL 101 photocell for the SupraMatic P immediately detects persons and objects. Families with children especially appreciate this level of safety.

---

**SupraMatic E**
Pull and push force: 650 N
Peak force: 800 N
Opening speed: max. 22 cm/s
Door width: up to 5500 mm
(max. 13.75 m² door surface)

**SupraMatic P**
Incl. photocell
Pull and push force: 750 N
Peak force: 1000 N
Opening speed: max. 22 cm/s
Door width: up to 6000 mm
(max. 15 m² door surface)
For heavy timber doors and doors with wicket doors

**SupraMatic HT ** NEW
For collective and underground garages.
Your Hörmann partner will be pleased to advise you further.

---

* The complete warranty conditions can be found at: www.hormann.co.uk
** With 5 door cycles per day and an electricity price of 0.25 euros/kWh
ProMatic garage door operators feature the same proven Hörmann technology as all Hörmann premium operators. This guarantees reliable function – at an attractive price.

Even in a garage without a mains connection, you can enjoy the comfort and convenience of an operator. The ProMatic Akku makes it possible. Easy to transport, it can be recharged in a matter of hours, or conveniently via the optional solar module.
Optional querying of the door position
You can use the optional HS 5 BS hand transmitter at any time to check that your garage door is closed (not for ProMatic Akku).

Additional opening setting
With the individually adjustable second opening height, you can ventilate your garage without completely opening the door (not for ProMatic Akku).

ProMatic
Pull and push force: 600 N
Peak force: 750 N
Opening speed: max. 14 cm/s
Door width: up to 5000 mm
(max. 11 m² door surface)

ProMatic Akku
For garages without power connection.
With 868 MHz fixed code (without door position query)
Pull and push force: 350 N
Peak force: 400 N
Opening speed: max. 13 cm/s
Door width: up to 3000 mm
(max. 8 m² door surface)

Battery
Operation period: approx. 40 days**
Charging time: 5 – 10 hours***
Weight: 8.8 kg
Dimensions: 330 × 220 × 115 mm

Easy overnight recharging
A practical carrying handle and its light weight make it easy to transport the battery for charging. The solar module makes charging even more convenient.

Solar module (optional)
A practical extension to ProMatic Akku takes over battery charging.
Delivery includes fitting material, 10 m connecting lead and charge controller, dimensions: 330 × 580 mm

* The complete warranty conditions can be found at: www.hormann.co.uk
** Based on an average of 4 door cycles per day and an ambient temperature of 20° Celsius
*** Depending on the charging state
The Hörmann operator boom
Security both day and night with automatic locking

---

**Exceptionally flat boom**
An exceptionally flat boom [2] – only 30 mm high – means that operators are easy to fit to any commercially available garage door and are therefore also ideal for retrofitting.

**Emergency release from inside**
To conveniently open the door from the inside in the event of a power failure [3].

**Universal fitting bracket**
The universal fitting bracket [4] fits all commercially available up-and-over and sectional doors.

**Maintenance-free toothed belt**
Reinforced with aramid fibres, the Kevlar toothed belt [5] is particularly tear-resistant and quiet-running. It does not require grease or lubricants, providing an important advantage over chain or spindle operators.

**Automatic belt tension**
A strong spring mechanism [6] tensions the toothed belt automatically, thus ensuring uniform, smooth running.

---

**Only from Hörmann**

**Automatic door locking in the operator boom**
When the garage door is closed, the anti-lift kit [1] automatically engages in the operator boom’s stop. The door locks immediately and is secured against forced opening. This process is purely mechanical and thus also functions without a power supply!

Take a look at the video at: www.hoermann.com/en/videos
Compact unit
Hörmann’s doors, operators and booms form a compact, permanently connected unit. Additional control units and exposed, movable connecting leads are not necessary.

Simple installation
Hörmann operators can be installed easily and quickly. Operator booms can be fastened individually thanks to variable suspensions: either to the ceiling or directly to the reinforced connection profile on the Hörmann sectional door (up to 3000 mm door width). An additional advantage: just one suspension is sufficient, even for long booms.

Centre installation
Centre installation of the operator rails on the door leaf results in uniform pull forces. No canting, no wear, which is frequently the case with e.g. operators installed on one side.

Simple installation
For Hörmann sectional doors with a width up to 3000 mm, the operator boom can be fitted on the door connection profile.

Special track application for hinged garage doors
Thanks to simple assembly of the optional track application, retrofitting is also very easy.
Good reasons to try Hörmann
Entrance gate operator quality features

1 Safe

Automatic safety cut-out
Hörmann entrance gate operators work reliably during all opening and closing phases. The gate stops immediately if it encounters an obstacle. Non-contact photocells detect persons or objects, providing additional safety. They can be easily integrated in our elegant safety key switch posts (see page 37) and placed near the entrance to monitor the area of travel of your hinged or sliding gate.

2 Reliable

Soft start and soft stop
Hörmann entrance gate operators open quietly and reliably. The gate opens without a jolt and gently brakes before fully closing. This protects the gate and operator and does not disturb your neighbours.
Tested safety
Hörmann entrance gate operators work safely during all opening and closing phases. The operating forces for common door sizes and fitting situations have been tested and certified by TÜV in accordance with DIN EN 13241-1.

Top quality
High-quality entrance gate operators from Hörmann are decidedly robust, ensuring that they can remain in good mechanical condition over the long run. Weather-resistant and lasting material ensures long-term function. Our RotaMatic version also comes with integral heating for use in especially cold regions.
Hinged gate operator RotaMatic / RotaMatic Akku
A streamlined operator with an elegant appearance

As standard with hand transmitter HS 5 BS in black textured surface, with chrome caps

Thanks to its modern, slimline design, Hörmann’s RotaMatic hinged gate operator is the perfect partner for your beautiful hinged gate. Just like the design, the functional and safety features are also exemplary. The RotaMatic Akku makes it possible to enjoy the convenience of an operator, even if there is no direct connection to the mains supply.
Convenient querying of the door position
With the standard hand transmitter HS 5 BS, you can check if your entrance gate is closed at any time (not for RotaMatic Akku).

RotaMatic Akku
Entrance gates without a power connection can be operated with the RotaMatic Akku. Its battery is easy to transport and can be charged in a matter of hours, e.g. overnight.

Solar module (optional)
An optional solar module makes the system completely independent of the mains supply. Delivery includes fitting material, 10 m connecting lead and charge controller. Dimensions: 330 × 580 mm

Sound-absorbing seal (optional)
The operating forces for many door sizes and fitting situations using RotaMatic operators with optional sound-absorbing seal have been tested and certified by TÜV.

Electric lock (optional)
Hinged gates are subjected to enormous forces under high wind loads. An additional electric lock secures them from being blown open.

RotaMatic
Gate leaf width: max. 2500 mm
Gate leaf height: max. 2000 mm
Weight: max. 220 kg

RotaMatic P
Gate leaf width: max. 2500 mm
Gate leaf height: max. 2000 mm
Weight: max. 400 kg

RotaMatic PL
Gate leaf width: max. 4000 mm
Gate leaf height: max. 2000 mm
Weight: max. 400 kg

RotaMatic Akku
With 868 MHz fixed code (without door position query)
Gate leaf width: max. 2500 mm
Gate leaf height: max. 2000 mm
Weight: max. 120 kg

Battery
Integrated in a lockable control cabinet
Operation period: approx. 30 days**
Charging time: 5 – 10 hours***
Weight: 8.8 kg
Dimensions: 320 × 220 × 115 mm

* The complete warranty conditions can be found at: www.hormann.co.uk
** Based on an average of 4 door cycles per day and an ambient temperature of 20° Celsius
*** Depending on the charging state

Optional accessories
- Electric lock (recommended from a leaf width of 1500 mm)
- Sound-absorbing seal
- Emergency battery HNA
- SK set (one-way photocell and traffic light)
- HSK 3 lockable emergency release
- Integral heating for colder regions (down to 35°C)
- Track variants for special fitting situations
Underground hinged gate operator DTU 250
An almost invisible operator for attractive gates

The underground operator DTU 250 is an almost invisible and space-saving solution for use in private areas. We recommend floor fitting to create especially elegant gates.

DTU 250
Gate leaf width: max. 2500 mm
Gate leaf height: max. 2500 mm
Weight: max. 500 kg

A radio unit must be ordered separately for this operator. Technical clarification is also required. Please contact your Hörmann dealer.
Hinged gate operator DTH 700
An especially robust and powerful operator

DTH 700
Gate leaf weight: max. 7000 mm
Gate leaf height: max. 2500 mm
Weight: max. 1000 kg

A radio unit must be ordered separately for this operator. Technical clarification is also required. Please contact your Hörmann dealer.

Hörmann’s DTH 700 operator is especially robust and powerful. For use in private and commercial applications.
Sliding gate operator LineaMatic
A compact and reliable operator

A radio unit must be ordered separately for the operator LineaMatic H. Technical clarification is also required. Please contact your Hörmann dealer.

Highlights of the sliding gate operator LineaMatic include its compact, height-adjustable housing made of zinc diecast and glass-fibre reinforced plastic, as well as its reliable operator electronics.

Convenient querying of the door position
You can use the standard HS 5 BS hand transmitter at any time to check that your entrance gate is closed.
The sliding gate operator STA 400 is specifically designed for large gates. The matching control B 460 FU ensures precise gate travel and smooth stopping.
Innovative technology for your home
Intelligent accessories for more comfort

Operate your garage door and entrance gate easily, conveniently and comfortably. Our elegant hand transmitters let you open your gate from your car as easily as you would operate a TV. Or you can position a stationary control element directly in front of or in your garage. The BiSecur app lets you control your operators with your smartphone or tablet from your sofa or anywhere in the world via the Internet.
The modern radio system for garage door and entrance gate operators

Interference-resistant
Interference-resistant radio signal with a stable range

128-bit encryption
Benefit from the same high security level as in online banking.

Impact-resistant
The hand transmitter is very sturdy thanks to a permanently installed antenna.

Backwards compatible
The new BiSecur control elements are also suitable for the operation of all Hörmann operators with a radio frequency of 868 MHz (year of manufacture 2003 – 06/2012). (Querying the door position is not possible).

Simple code transmission
Your individual hand transmitter coding can be easily transmitted to another hand transmitter.

A beautiful way to control your gate operators. Hörmann's elegant hand transmitters combine function and design.

A fingerprint is all you need to open the door without the need to search for your key.

Easy transmission of the radio code to other hand transmitters

The Hörmann Gateway and BiSecur app let you easily control your operators from your sofa or anywhere in the world via the Internet.

for up to 12/100/1000 keys.
Key switch post STS 1

The key switch post STS is available with one or two adapters for command units (must be ordered separately). Transponder key switches, code switches, finger-scans or key switches can be installed. The post is White aluminium (RAL 9006), the cover and base are Slate grey (RAL 7015). Protected for outdoor use in accordance with IP 44.

Height: 1250 mm, base diameter: 300 mm.

---

**Internal push button IT 1**
With impulse button to open and close the door (for ProMatic, SupraMatic and ProMatic Akku).

**Internal push button IT 1b**
You can conveniently open the door by pushing the large, illuminated button on the IT 1b (for ProMatic and SupraMatic).

**Internal push button IT 3b**
Along with a large illuminated button for conveniently opening the door, the internal push button IT 3b has two additional buttons. These can be used to control the operator light and completely switch off the radio-control system for the operator, e.g. while you are away on holiday (for SupraMatic).

**Internal push button PB 3**
With illuminated impulse button to open or close the door, button for garage light and button to switch off the radio system (for SupraMatic).

**Key switch STUP 40 / STAP 40**
In a recessed version and surface-mounted version, including 3 keys.

**Key switch ESU 40 / ESA 40**
In a recessed version and surface-mounted version, including 3 keys.
Hörmann products are always a bit more sophisticated. Many useful details make it easier to operate your door with increased security. Photocells effectively secure your garage door or gate, families with children especially appreciate this level of safety. Thanks to the emergency battery, you can reliably open your door even after a power failure.
**Emergency battery HNA for garage door operators**

With this emergency power supply, you can bypass network power failures for up to 18 hours and max. 5 door cycles. The emergency battery recharges itself during normal operation. Emergency batteries can be added to all current Hörmann garage door operators.

**Emergency battery HNA Outdoor for entrance gate operators**

The RotaMatic hinged gate operator and LineaMatic sliding gate operators can also be equipped with an emergency power supply to bridge power failures. They can be universally fitted to the wall or floor.

**Additional emergency release**

For garages without a second entrance, we offer you the following options to open the door from the outside in case of emergency (e.g. power failure):

**Sectional doors without a handle**

Choose between the emergency release lock with round cylinder (cannot be integrated in the home locking system) and the emergency release handle in 8 variations including lock (can be integrated in the home locking system).

**Up-and-over doors and sectional doors with a handle**

Emergency release (not shown)

**Photocell**

Hörmann’s reliable one-way photocell systems immediately stop the gate if the light beam is interrupted. They can be directly fitted to the door or integrated in STL key switch posts.

**Signal lamp**

A warning light on your entrance gate provides you with extra security, day and night.
Hörmann key switch post sets made of weather-resistant, anodised aluminium offer you more light and security. The posts can be individually equipped using variable inserts for photocells and LED light modules.
Ensure a bright, safe entrance area

Light key switch post SLS
The light key switch post SLS with an LED light module is available in heights of 550 mm and 1080 mm. The 1080 mm key switch post is also available with two LED light modules to improve the lighting in your entrance area.

- **SLS-K**
  - with LED light module
  - Height 550 mm

- **SLS-L**
  - with double LED module
  - Height 1080 mm

- **SLS-L**
  - with LED light module and design screen
  - Height 1080 mm

  Energy efficiency class A

LED light modules
You can choose between a warm or neutral white light in the light modules. The optional aluminium design screen creates a special accent.

Safety key switch post STL
The 550-mm-high basic version is equipped with a photocell holder. The key switch posts can be optionally supplied with two photocells or a photocell and LED light module.

- **STL**
  - with optional photocell

- **STL**
  - with two optional photocells

- **STL**
  - with optional photocell and LED light module

LED lighting for doors
An LED light strip with neutral white light puts your door and side door in the right light. The plug-in system can be shortened individually, making it a perfect fit for any door width. You can arrange the LED light strip at the lintel (figure above) or bottom edge of the door leaf.

  - LED distance: 125 mm

  Energy efficiency class A

Note: In order to comply with the requirements in DIN EN 13241, we recommend using a closing edge safety device.
Hörmann provides an excellent basis for comprehensive planning. Carefully matched solutions offer you the very best in perfectly designed products for every area.

**Garage doors**
Optimally match your personal architectural style: up-and-over or sectional doors made of steel or timber.

**Door operators**
Enjoy extra convenience and break-in-resistant security: Hörmann operators for garage doors and entrance gates.

**Entrance doors**
Our comprehensive entrance door ranges include models that fit almost every need and requirement.

**Steel doors**
Sturdy doors for your entire home, from basement to roof.

**Frames**
Choose from our comprehensive range of products for new construction, expansion and modernisation.

www.hoermann.com
Hörmann: Quality without Compromise

Hörmann is the only manufacturer worldwide that offers you a complete range of all major building products from one source. We manufacture in highly-specialised factories using the latest production technologies. The close-meshed network of sales and service companies throughout Europe, and activities in the USA and China, make Hörmann your strong partner for first-class building products, offering “Quality without Compromise.”
