Our Name, Your Promise
You can trust Hörmann brand quality

“A good name has to be earned.” (August Hörmann)

In line with the philosophy of the company’s founder, the Hörmann brand remains a guarantee for quality. With more than 75 years of experience in the construction of doors and operators and more than 20 million doors and operators sold, the family-owned business has become number 1 in Europe. This is very reassuring when buying a Hörmann Series 2000 garage door.
Based on German engineering, assembled in the U.K.

All doors and operator components are developed and manufactured by Hörmann. Hörmann Series 2000 garage doors are assembled at the Hörmann factory in Leicestershire from components sourced from both the continent and the UK.

Garage doors for generations

Thanks to excellent technical solutions and uncompromising quality assurance, you receive a 10-year warranty on all Series 2000 garage doors and 5 years on all Hörmann operators.*

Be environmentally aware

Responsible use of resources and uncompromising implementation of environmental protection regulations are two of Hörmann’s traditional top priorities. We have substantially reduced the energy required for production through ultra-modern systems and by using improved, environmentally-friendly processes. Hörmann will continue to follow and push forward with this philosophy in the future.

* The complete warranty conditions can be found at: www.hormann.co.uk
Series 2000 steel up-and-over doors
Stylish designs – outstanding performance
The classic designs in steel

Series 2000 steel doors are timeless in appearance, never ageing your property. Whether choosing one of the ribbed or panelled designs, they offer a quiet elegance blending in with any environment whilst giving a lasting prestige.

The doors are galvanised with a high-quality polyester powder-coating and come protected against adverse weather conditions and corrosion, maintaining the long term beauty of the door.

Matching side doors are available for all steel designs except 2101, 2103, 2504.

For door and accessory options, please see pages 18–21
Series 2000 timber up-and-over doors
Timber infills exquisitely crafted for a lasting appeal
The natural beauty of timber

Whatever the style of your property, traditional or modern architecture, our styles of timber doors in either panelled or tongued and grooved design, offer you the choice to find a style that will add warmth and character to your home. The carefully selected cedar wood is not only chosen for its aesthetic beauty but also for its natural durability, insulation and sound absorption.

All our timber doors are carefully manufactured and supplied with a factory-finish dip immersion coat, for temporary protection. We use Remmers Induline GW306 base stain primer 006 Light Oak. Additional on-site finishing is required. Fully finished wood stain and colour options are also available. With wood being a natural product, any finish may vary and movement of components and joints may occur, particularly in changes of weather from very wet to hot sunshine. This is what gives your door its individual character.

Wood needs protecting. That’s why, in addition to the factory impregnation, it is important to apply a pigmented wood preservative to a timber garage door, in order to protect it against atmospheric influences and the effects of UV rays.

Series 2000 GRP up-and-over doors
The look of timber, the benefit of GRP
Elegant and durable GRP doors

If low maintenance is an important factor to you, a Glass Reinforced Polyester door is just what you’re looking for. While requiring minimum maintenance it will give you the long-lasting elegant look and character of genuine timber.

Our GRP doors are available in a supersmooth, high gloss white finish and a variety of timber looks. You will surely find the right finish to complement all your architectural requirements.

The timber character surface finish of GRP doors is not only different by colour but also by its underlying appearance.

All panes are made of tough, durable, perspex.
Handle options
Beautiful handles accent the door

Door Handle options for
Series 2000 Steel, Timber and GRP
up-and-over design

1 Synthetic black, standard
2 Side door handle black, standard
3 Cast aluminium, white
4 Cast aluminium, brown
5 Cast aluminium, silver finish
6 Brushed, stainless steel
7 Cast aluminium, brass finish
8 Polished, stainless steel

A beautiful handle adds value. Its ergonomic design gives you a safe and firm grip.

Side doors come with a profile cylinder lock and a black, synthetic lever/lever handle set as standard. They are available in the same material choices as the garage door handles. Optional lever/knob handle set available.
Colour and surface finish options
Personalise your door

Colour options for Steel design
1 Moss green (RAL 6005)
2 Terra brown (RAL 8028)
3 Signal blue (RAL 5005)
4 Steel blue (RAL 5011)
5 Ruby red (RAL 3003)
6 Jet black (RAL 9005)
7 Traffic white (RAL 9016)

All our steel door designs come in Traffic white (RAL 9016) as standard, except for the open-for-infill frame which comes in Terra brown (RAL 8028).

Contact your Hörmann specialist dealer for advice regarding coloured doors.

Surface options for Steel design
1 Decograin Golden Oak
2 Decograin Rosewood
Wood stain for Timber design

1. Walnut
2. Ebony
3. Rosewood
4. Medium Oak
5. Light Oak
6. Dark Oak
7. Golden Oak
8. Mahogany
9. Teak

With wood being a natural product the finish of the doors supplied may vary from those shown.

Colour options for Timber design

1. White
2. RAL to choose

Our timber doors are now available in a white and RAL to choose colour options.

Colour finishes for GRP design

1. White supersmooth
2. White woodgrain
3. Mahogany woodgrain
4. Dark Oak woodgrain
5. Countryside Oak woodgrain
6. Cherry Oak woodgrain
Safety features to the latest European Standard 13241-1

The retractable gear for single and double garage doors

1 Finger-trap protection
2 Track roller well
3 Spring system
Retractable door

- Retractable mechanisms are ideally suited to automatic operation.
- Single or double door version available.
- An optional 4 point locking kit is available. It comprising steel locking bar rods and slam-shut latches to increase the number of locking points.
- Hörmann offers a steel fixing frame for all single and double retractable doors. This frame makes an on-site timber frame redundant and saves valuable installation time as it is quick and easy to fit.

<td></td>
</tr>
</tbody>
</table>

Even if you have answered only one of the above with “no”, your door is no longer safe.
Safety features to the latest European Standard 13241-1
The canopy gear for single doors

1. Cable drum
2. Internally guided cables
3. Anti-fall safeguard
4. Protective cover profiles
Canopy door

- Only Single door version available.
- An optional 4 point locking kit is available. It comprising steel locking bar rods and slam-shut latches to increase the number of locking points.
- Hörmann offers a steel fixing frame for all single and double retractable doors. This frame makes an on-site timber frame redundant and saves valuable installation time as it is quick and easy to fit.

Safety checklist
For your old canopy up-and-over door

- Is the door safely and securely guided as well as protected against uncontrolled movements?  
- Does your door have a cable drum with deep grooves to ensure the cable fits securely and prevents cables jumping?  
- Are the door’s cables internally guided?  
- Is there an anti-fall safeguard fitted to your present door to prevent injury if a cable breaks?  
- Are the tracks designed in such a way that it is impossible for the rollers to derail?  
- After opening, does the door come to a safe stop?  
- Do protective cover strips on the frame and the door leaf prevent trapped fingers?

Even if you have answered only one of the above with "no", your door is no longer safe.
Style 2011
Design your own door with the open-for-infill frame
Solid basis

- Extremely sturdy frame construction with reinforced struts. Fully welded!

- Min. infill weight: 6 kg per m², max. infill weight 10 kg per m².

- Fully galvanised, door leaf frame additionally with high-grade polyester primer coating Terra brown (RAL 8028) or Traffic white (RAL 9016).

- Frame and struts pre-drilled at 30 mm spacings.

- Illustrated fitting instructions with suggested designs.

With design 2011 open-for-infill, door widths of up to 5 m are possible (for any width over 4267 mm, please refer to the DF98 range) if the permissible infill weight is complied with.
Modernise and Enhance
Hörmann offers optimal solutions for every fitting and renovation situation

Rubber bottom profiles (optional)
In garages without a threshold, a flexible, weather-resistant rubber bottom profile helps keep out passing debris.

Compensation panels and modernisation panels
Should your garage opening be higher and wider than the inexpensive standard sized garage door, simply adjust the sides and the lintel with panels that match the door. If the brickwork is damaged while removing the old door, modernisation panels [1] ensure a clean result without the need for further plastering.
Benefit from the inexpensive standard sizes. Of course, we can also easily provide you with any required special solutions.

Optional retractable plus
Still conforming to the EN 13241-1 this gear allows for a clear drive through passage wider than the standard retractable gear. This makes parking the car in the garage a lot more convenient!

Also purchase a matching operator
Ensures comfortable opening and closing and offers more security against forced opening of the door.

ProMatic Akku with solar module
The solution for a garage door operator in prefabricated garages and garage blocks without a power connection: A portable battery supplies the operator with power and can be charged inside the house via a normal power socket. You should also enquire about the ProMatic Akku solar module. This then saves you having to charge the accumulator manually.
Two Operator Variants
Day and night security through automatic door locking

SupraMatic
The ultra-quick operator with an array of additional functions

As standard with the 5-button hand transmitter HS 5 BS and 2-button hand transmitter HSE 2 BS with black textured surface.

ProMatic
The good-value starter model as an introduction to Hörmann’s premium quality

As standard with two, 2-button hand transmitters HSE 2 BS with black textured surface.
SupraMatic
The high-quality operator with an array of additional functions, for a maximum of 50 door cycles* (open/close) per day.
Opening speed: 22 cm/s.
• Halogen lighting can be switched on/off separately
• Partial opening facility for a well ventilated garage

SupraMatic E
For doors up to 5500 mm wide
(max. 13.75 m² door surface)
Peak force: 650 N

SupraMatic P
As standard incl. photocell
For doors up to 6000 mm wide
(max. 15 m² door surface)
heavy timber doors and sectional doors with wicket doors.
Peak force: 1000 N

ProMatic
The inexpensive starter model as an introduction to Hörmann’s premium quality, for a maximum of 12 door cycles (open/close) per day.
Opening speed: 14 cm/s.

ProMatic
For doors up to 5000 mm wide
(max. 11 m² door surface)
Peak force: 750 N

ProMatic Akku
For garages not connected to the mains supply and doors up to 3000 mm wide
(max. 8 m² door surface)
Peak force: 400 N

Power Operated Garage Doors
It is against the law to install a power operated garage door in the UK without complying with the Machinery Directive. To comply with the Machinery Directive both the door and the operator used in the installation must have a Declaration of Incorporation from the manufacturer. On completion of the installation the installer must provide a Declaration of Conformity and apply a CE mark giving details of the installation to the door / operator combination, which is now classed as a machine. The installer must issue to the customer a Declaration of Conformity on completion of the installation. The installer must hold copies of both the Declaration of Incorporation and the Declaration of Conformity on a technical file for inspection by the relevant authorities. If any of the above requirements are not fulfilled the installation is illegal.

Please ensure for your own safety and peace of mind that whoever installs your electric operator is both willing and able to fulfil these requirements; if they are not - do not use them!

Members of the DHF Garage Door Installer Group can and will install your Hörmann operator safely and legally.

Fitting details for
Series 2000 retractable gear for single doors

Position of anchors

Overall frame size
Recommended structural dim.
= Clear passage width = nominal - 105
height = nominal - 120

Fitting behind the opening

Overall frame size = nominal opening + 140
Nominal opening width

Overall frame size = nominal opening + 140
Nominal opening width

The recommended structural dimensions are recommended planning dimensions. Minimum sideroom, headroom and opening sizes are all based on these dimensions.

Fitting in the opening

Overall frame size = nominal opening + 140
Nominal opening width

Overall frame size = nominal opening + 140
Nominal opening width

Fitting in the opening requires that the given dimensions be adhered to with greater accuracy.

With ProMatic/SupraMatic operator
No additional headroom required.
Exception: some timber designs allow 15 mm clearance.
Fitting details for
Series 2000 canopy gear for single doors

Position of anchors

Clear passage
Width:
nominal opening less 40 mm (1½")
only within bottom 1/3 due to flexible seals.

Height:
nominal door height - 140

For doors with operator 40 mm headroom above top crossframe required.
(Overall frame size + 40 mm)

Fitting behind the opening

Behind opening installation with the Hörmann steel frame allows for a wider range of structural openings to be spanned, this can be particularly helpful with non-standard openings which would normally require special sized doors. The diagrams show the minimum tolerances that should be adhered to.

PLEASE NOTE: the overall frame sizes are shown as additions to the nominal opening sizes.

Fitting in the opening

The size chart gives the structural opening sizes for each door size, this frame is the standard 2 ¾"(70 mm) square. A narrow application gear is provided for doors to be fixed to timber frames allowing the frame to be a minimum of 2 ¼"(55 mm) square if required, allowing the door to be fitted to smaller structural opening. For electric operation with canopy door a bow arm must be purchased separately.

For overall dimensions of Hörmann steel frame, add 5 ½ (140 mm) to nominal opening width and 2 ¼ (57 mm) to nominal opening height.
